Significant Projects

Institutional

The Alice B Rapoport Center at Goodman Theatre

Chicago, IL

(In-Progress) Project Architect

The Goodman Theatre expansion (10,000sf adjacent to the Goodman Theatre) when completed in Spring 2016 will allow for the expansion of the theatre's community engagement and education programs. LEED-CI certification (anticipated)

Chicago Urban League Outreach Center

Chicago, IL

(In-Progress) Project Architect

The center for Human Capital Development in the Back of the Yards neighborhood will allow the Chicago Urban League to their outreach programs to African American boys and men providing them with the tools needed for an improved quality of life.

Butler College Prep

Chicago, IL

2013-2015, Project Architect

The 67,000sf phased co-share of a new Noble Network of Charter Schools campus into Corliss High School-CPS. This campus provides an under-served neighborhood with an alternative to the traditional high school experience.

Wolcott School

Chicago, IL

2011-2013, Project Architect

Conceived by a local grassroots not-for-profit, Wolcott School opened in 2013 as the Chicago region's only high-school tailored to the strengths and aspirations of students with Learning Differences. The facility incorporates the James Tyree Community Resource Center, which offers educational seminars and shares best practices with special educators and parents from school districts throughout the entire region.

Inspiration Kitchens

Chicago, IL

2009-2011, Project Architect

7,300 sq. ft. facility with a 80 seat restaurant that serves subsidized meals to working poor families and market rate meals to the general public; a combination service, catering and training kitchen from which a 13 week food service training program is conducted. The facility has a sustainable garden that supplies fresh herbs and vegetables for the restaurant and serves as an educational resource for students, local school children and the community. LEED-Gold.

Wolcott School Open House

Residential

Ambassador Residence I Chicago, IL
2010-2011, Project Architect

A penthouse apartment for a family of five, designed to balance intimate spaces for family with social spaces for guests. The main residence is located on the 12th floor which was previously the mechanical penthouse with 12-13 foot high ceilings and sweeping views south (downtown Chicago), East (Lake Michigan) and West.

Eugenie Residence Chicago, IL
2008-2009, Project Architect

Complete renovation of a brick and wood frame single family residence built in 1870s located on a landmarked street in Chicago's Old Town neighborhood.

Camp Charlie Indiana
2007-2008, Project Architect

Set on eight acres of rolling Indiana farmland, the scale, siting and language of this second home and artist's studio is rooted in the vernacular. The siting of the project emphasizes the length of the site while taking advantage of its unique features.

Office

Crosby Associates Office III Chicago, IL
(In-Progress) Project Architect

Located on the 35th floor of the historic Chicago Board of Trade building the space has been designed to support a collaborative open studio environment, conference spaces and office support space.

Master Planning

Foundations College Prep Chicago, IL
(In-Progress) Project Architect

Located in the Roseland neighborhood, the project has two components, a phased renovation of a former CPS building and the master planning of the two acre site to include additional advisory "bustles", a gymnasium with dedicated lunch room, a two story high school building, exterior gardens and athletic fields.

Inspiration Kitchens sustainable garden

Wolcott School

role of nominee Project Architect, Designer, Interiors, LEED Coordinator

location 524 N. Wolcott Ave, Chicago, IL

year completed 2012

client Wolcott School

architect of record Wheeler Kearns Architects

photographer Steve Hall / Hedrich Blessing

synopsis The adaptive reuse of a 1926 Union League Boys and Girls Club building into Chicago's first high school dedicated to students with learning differences. Designed as the antithesis to "one-size-fits-all" school buildings, Wolcott supports individual learning styles in a community environment. Classrooms are partnered with one or more semi-private huddle rooms and common collaborative areas. Significant interior historical building elements were saved, including three original fireplaces stacked in the center of the building which become common areas for collaborative learning around traditional worktops or informal social seating. A former windowless swimming pool and paved play lot is transformed into a light-filled multi-purpose room facing a new garden. To counter the formality of the traditional entry, the garden was designed to act as an inviting alternative entry for the students, some of whom have struggled with negative associations of conventional schooling.

Eugenie Residence

role of nominee Project Architect, Designer, Interiors

location 217 W. Eugenie, Chicago, IL 60614 (please withhold address)

year completed 2009

client Withheld

architect of record Wheeler Kearns Architects

photographer Toni Soluri

synopsis Built in the 1870's, this two-story brick and wood frame single family residence is located in a landmark district of Chicago. Although exterior changes visible from the street are restricted by landmark guidelines, the project included a complete gut renovation of the interior and the removal of a 1980's two-story addition in the rear yard. The newly opened interior space is defined and vertically connected by a central two-story volume that is naturally lit from a series of skylights above. The central volume contains the home's service spaces and is carved to reveal an open stair whose landing extends to form the kitchen counter. A wall of cabinetry on the west complements the stark gallery wall on the east. The large south-facing opening extends the living space into the garden and provides natural light and views deep within the house.

Ambassador Residence I

role of nominee Project Architect, Designer

location Gold Coast Neighborhood, Chicago, IL

year completed 2012

client Withheld

architect of record Wheeler Kearns Architects

photographer Toni Soluri

synopsis Located in Chicago's Gold Coast neighborhood in a former hotel, this penthouse apartment for a family of five was designed to balance intimate spaces for family with social spaces for guests. The main residence is located on the 12th floor which was previously the mechanical penthouse with 12-13 foot high ceilings and sweeping views south (downtown Chicago), East (Lake Michigan) and West. The owner's love of contemporary art and vibrant textiles had a significant impact on the apartments' detailing, including millwork, lighting and finish materials. As a result, the architecture is a "neutral" container allowing the occupant to focus on the art and furnishings. The main architectural element is the spiral stair in the entry foyer which connects the main floor common spaces (Kitchen, Dining Rm, Living Room and Study) and bedrooms to the 13th floor family/guest room and exterior terrace.

Foundations College Prep

role of nominee Project Architect

location 1233 W. 109th Pl., Chicago, IL 60643

year completed Phase 1: 2015; Phase 2: est. 2017; Phase 3: est. 2019

client Foundations College Prep

architect of record Wheeler Kearns Architects

photographer Evan Thomas / Studio Thomas Photography

synopsis Located in the Roseland neighborhood, the project entails the phased renovation of a former 25,600sf one-story CPS/Private grade school into a 6th through 12th grade for Foundations College Prep a new charter middle/high school. In its rebirth, the renovated school building is anchor building on the future two acre campus, which will ultimately enroll 800 students. Leveraging a blended learning model, Foundations employs an open Learning Center classroom that provides collaborative and individual work areas for up to 40 students. Master planning for the remaining phases of the project include additional advisory "bustles", a gymnasium with dedicated lunch room, a two story high school building, exterior gardens and athletic fields.

statement from nominee I affirm that this entry meets the requirements as stated in the Call for Entries. I verify that the entry is entirely the work of those listed in this form.

Existing:

25,600 sf 1960's One-Story Concrete Frame Building built over a crawl space

Year: 2014

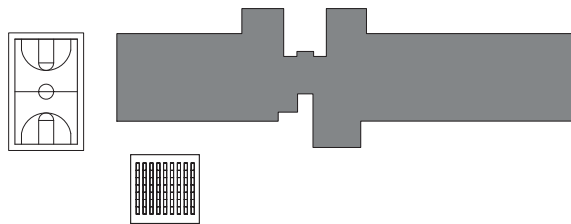

Phase 1:

1A: Interior Renovations of the existing west wing, Accessibility improvements

1B: Exterior Renovations including a new insulated roof installed over the entire building, Exterior Basketball & Raised Planter Bed

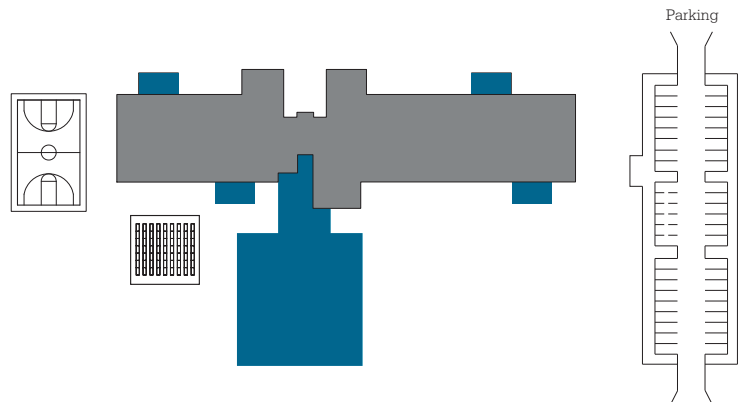

Year: Summer 2014 & Summer 2015

Phase 2:

A new multipurpose addition, housing a gymnasium, support spaces, and cafeteria will be constructed to the south of the main entry. Displaced by the addition, site parking and drop off will be relocated to the east side of the site. Four advisory "bustles" will be added to existing classrooms to provide additional areas for learning.

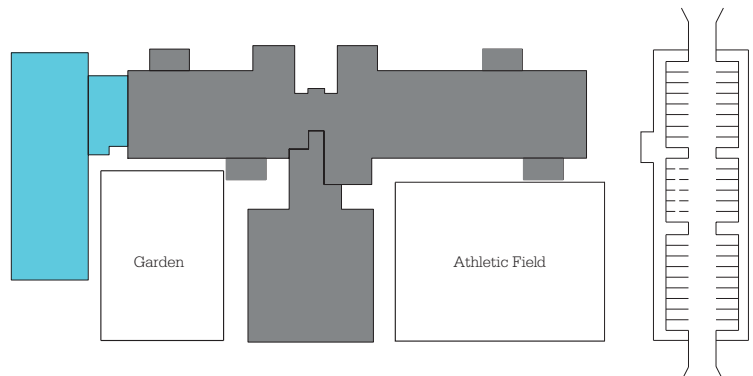

Year: 2018-2019

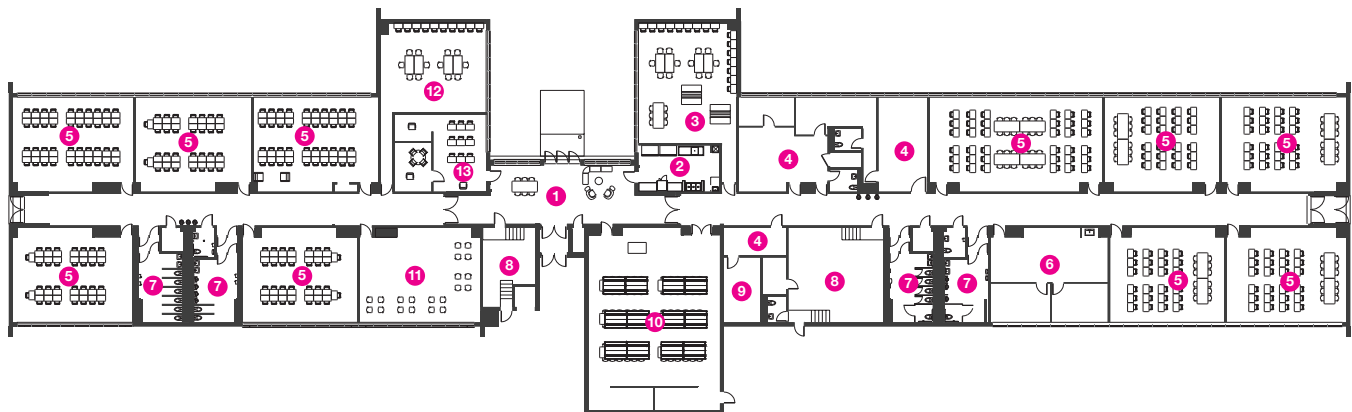

Phase 3:

A 2-Story High-School with a 1-Story Link will be constructed to the west along with a garden and an athletic field.

Year: 2018-2019

client Crosby Associates

architect of record Wheeler Kearns Architects

photographer Steve Hall / Hedrich Blessing

synopsis Located on the second floor of a 15 story office tower, originally designed by legendary architect William LeBarron Jenney, this classically designed steel frame structure provided the perfect shell for an office/studio for a graphic design firm. The 4200 sf space was designed to support a collaborative open studio environment, conference spaces and office support space. Large windows, high ceilings and restored plaster ornament from the original structure provide contrast for the newly constructed space defined by floating planes, lighting, and utilitarian elements. Bright white walls and ceiling act as light reflecting surfaces to illuminate true color of graphic work and presentations.

statement from nominee I affirm that this entry meets the requirements as stated in the Call for Entries. I verify that the entry is entirely the work of those listed in this form.

role of nominee Project Architect, LEED Coordinator, Interiors

location 170 N. Dearborn Street, Chicago, IL 60601

year completed In-Progress, est. 2016

client Goodman Theatre

architect of record Wheeler Kearns Architects

synopsis The new Goodman Center, 10,000sf adjacent to the Goodman Theatre will allow for the expansion of the theatre's community engagement and education programs to teachers, teenagers and seniors from across the City. Envisioned as a space which immerses the user "within the trees", a double sided acoustical wood slatted folding wall forms the outer face of each learning space and reception area, concrete columns are left exposed to "puncture the clouds" i.e. ceiling via a 6" reveal around each column at the ceiling. It center will include two rehearsal labs, a STEM learning lab, a reception space and additional support spaces all designed with sophisticated audio visual equipment, lighting (both natural and artificial) and acoustics.

client Inspiration Corporation

architect of record Wheeler Kearns Architects

photographer Steve Hall / Hedrich Blessing

synopsis The adaptive reuse of a 1906 single-story 7,300 sf building and the improvement of three vacant lots into a culinary training and catering kitchen, and an 80 seat restaurant. Prior to its current use, the building housed a company which manufactured parts for metal working lathes, and most recently a storage facility with no functioning utilities. The lots were developed into a sustainable garden for the restaurant and an educational resource for the community, stormwater retention reservoir, and a vegetated trellis shading the restaurant dining area. The building is now a place where trainees alter the trajectory of their lives and local families enjoy nutritious meals in Chicago's largest food desert.

awards received 2013 Rudy Bruner Award - Gold; 2013 AIA San Francisco Social Impact Design - Honor Award; 2013 AIA Illinois Honor Awards - Citation of Merit; 2012 USGBC Illinois Chapter Emerald Award - Building Renovations; 2012 AIA Chicago SustainABILITY Leadership Award - Honor Award; 2012 Urban Land Institute Chicago Vision Award - Non-Profit Winner; 2011 Richard Driehaus Foundation Award for Architectural Excellence - Second Place; 2011 Chicago Association of Realtors Good Neighbor Award; 2011 SEED'S Structures for Inclusion Award; LEED Gold Certification

Before: Warehouse interior prior to renovation; Existing sawtooth roof

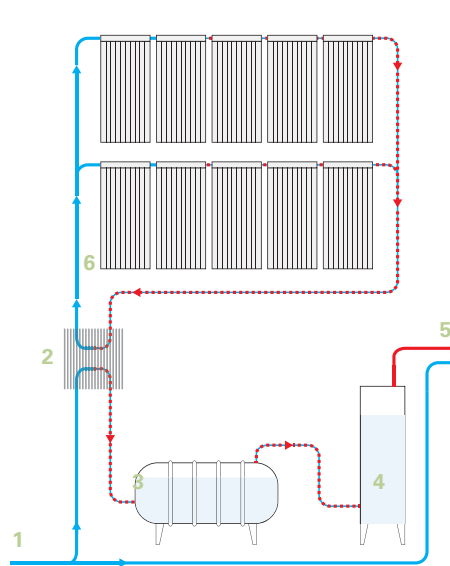

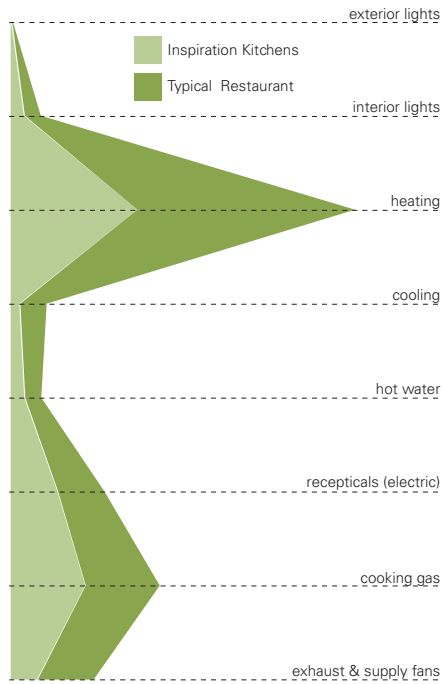

Energy Use Comparison

Solar Thermal Hot Water

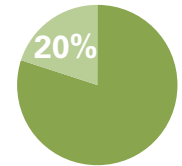

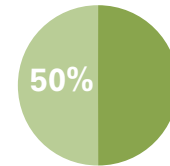

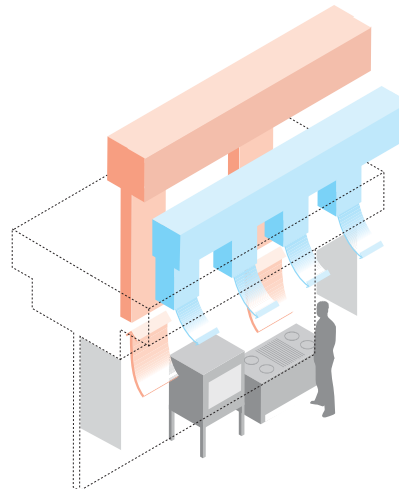

150,000
estimated gallons of water heated to 100°F per year.

\$1,500
estimated savings in gas per year when compared to a highly efficient new restaurant.

- 1 cold water supply
- 2 heat exchanger
- 3 storage tank
- 4 hot water heater
- 5 to fixtures
- 6 evacuated tube solar thermal panels

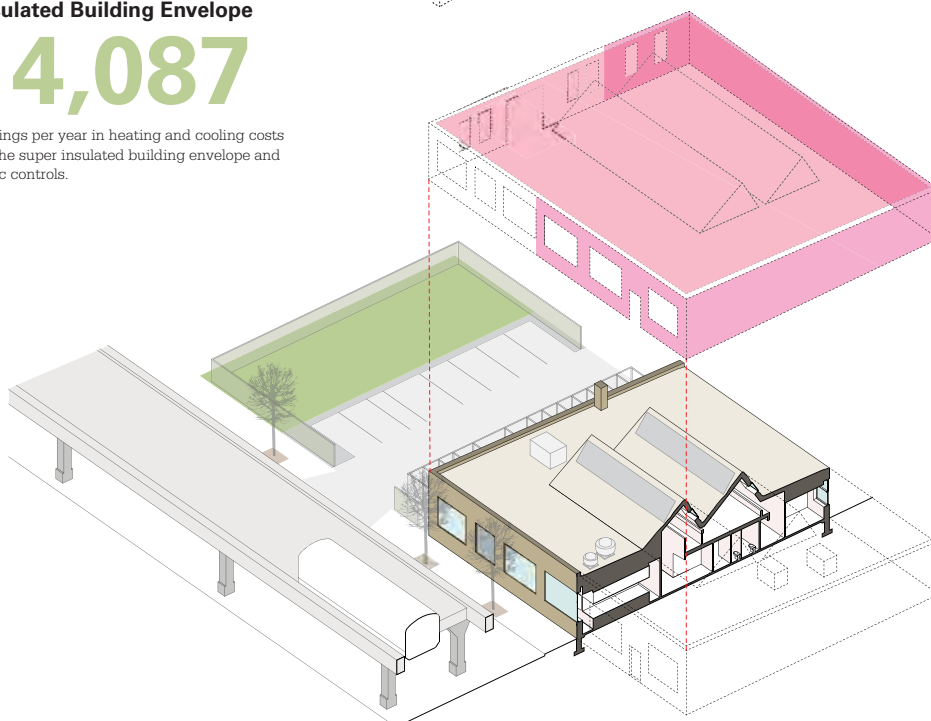

High Efficiency Exhaust Hood

\$13,687
estimated savings per year when compared to a typical island hood with four open sides. Each ventilation hood is enclosed on three sides allowing for smaller fans which operate only in response to cooking heat.

Super Insulated Building Envelope

\$14,087
estimated savings per year in heating and cooling costs attributed to the super insulated building envelope and advanced hvac controls.

Before: Uninhabited 1906 single story masonry building along an under-developed stretch of west Lake Street in East Garfield Park
